FOOTJOY D.N.A HELIX

D.N.A. Helix is FJ's latest performance footwear that is simply put: Wrapped in Innovation. Featuring the most comprehensive package in FJ's line, Helix is all about combining comfort with an entirely new stability chassis specifically engineered from feedback given by the world's best players.

Made using ChromoSkin leather, developed by Pittards of England, it is a supple, lightweight, durable and fully

waterproof leather that can withstand the harshest of conditions. TourSpec Stretch tongue provides breathability and a three-dimensional FoamCollar 2.0 molds to the ankle for a better fit.

Adding to that is a lightweight Fine Tuned Foam (FTF) fit-bed that provides optimum underfoot comfort and heel support, a LoPro 2 last that offers a fully rounded front, and NitroThin 3.0 TPU outsole that is super lightweight.

OSIM

Although golf is meant to relax the mind after being sedentary and stressed up in the modern working world, the physical body may not be ready for the onslaught of twists, turns and walking over 18 holes.

Enter OSIM's uLove 2 Massage Chair and uSqueeze 2 Leg Massager, both primed to provide the ultimate relaxation and much needed restoration after a round of golf.

In Ruby Red, the uLove 2 chair comes with its proprietary

4-hands massage that mimic the ultimate in spa

pampering – having two masseuse providing massage treatment concurrently. Luxuriously appointed, this AI powered piece of technology can even 'learn' habits and penchants and develop customised programmes for its user.

Next, OSIM uSqueeze 2 Leg Massager offers much-needed relief for golfers who enjoy walking the course. After averaging five kilometres, what better way to pamper the feet than by placing them within the confines of this product that uses reflexology techniques to heal tired calves and feet.

With five angles to fit almost every leg, it can also flip up to 158 degrees to accommodate the thigh area as well.

HONMA

Honma has come a long way from their 60-year heritage. With that momentous anniversary just past last year, the premium Japanese brand has made a habit of producing "exceptional functionality and refined sensibilities" throughout its product lines, not just golf clubs.

In this modern day iteration, Honma also currently houses a bevy of 'soft' goods, including this 2019 BERES Collection that sees both Boston and cart bags being inspired by the refined classics of working gentlemen.

Mixing practicality and elegance, it comes in a suit of various colours such as wine, navy and warm shades of brown to complete the look of a distinguished golfer.

For the younger set, the Tour World series showcases more bright colours with the same amount of storage space. An extensive line of golf bags – from staff bags, cart bags to stand bags, leaves you spoilt for choice!

CLEVELAND CBX 2 WEDGE

Roger Cleveland may have left the company but his namesake producer still makes top-grade, top-of-the-line wedges. This time round, it has released the latest iteration of its popular CBX series called the CBX 2.

A forgiving short game club designed with a hollow cavity and gel- back insert that surprisingly aids in shotmaking.

Built in is the brand's proprietary Dynamic Sole interacts well with any turf surface. Against its Rotex Face, spin is enhanced especially for those shot-stopping shots that will get golfers closer to the hole more often.

Lightweight, forgiving, and well-balanced, the Cleveland CBX 2 wedge may just be the right club for average and even more accomplished golfers alike. Comes in three sole options, "V", "S" and "C".

TITLEIST TS HYBRID

The Titleist Speed Project is still underway and most recently, it has launched a set of TS2 and TS3 hybrid clubs.

The tremendously forgiving TS2 hybrids maximise performance for players who have a sweeping delivery to the ball – delivering high launch and easy distance. The larger profile is designed for players who prefer the look of a fairway metal.

The fast-launching TS3 hybrids produce outstanding distance and control for players who hit down on the ball – offering mid launch, precise distance and iron-like control.

The compact and square toe shape is designed for players who want more of an iron look.
